

We're With You Every Step of the Way

1 Solar Analysis

We'll visit your property and perform a free solar analysis. Next we'll deliver an easy to understand proposal explaining all financial aspects and expectations. No obligations.

2 Application Process

We take care of filing all required paperwork on your behalf. This includes microFIT/FIT, Permits, Hydro One Application, ESA Inspection, Contract Completion.

3 Project Construction

Our experienced and knowledgeable team will carry out the construction process from excavation to hook up. This ensures the job is done right.

4 Real Time Monitoring

We'll setup monitoring to allow Strathcona Solar and yourself to monitor the system for performance. Our trained technicians will be on site immediately should any issues arise.

5 Monthly Performance Reviews

We provide monthly performance reviews which let you know how your system is doing. We're also available for any questions you may have.

Free Site Evaluation

100% Free of Charge, No Obligation.

If you are interested in making a sound investment in your future, harvesting energy all year, call us for a FREE, no obligation solar evaluation of your property. You will be pleased with the potential.

By Strathcona Solar Initiatives in Napanea Ontario

START HARVESTING EVERYDAY FROM YOUR ROOFTOP OR FIELD

Through Ontario's Green Energy Act, Ontario Farmers have the opportunity to add a profitable, low maintenance crop to their farm, SOLAR ENERGY.

How does it work?

What is my earning potential?

Rooftop Solar PV System

A 10kW microFIT contract can generate for you a future value of up to \$210,702.99. This program will generate a profit for you in month one. The OPA currently pays 80.2 cents for every Kilowatt Hour produced.

Ground Mount Solar Tracker System

A 10Kw microFIT contract can generate for you a future value of up to \$207,446.73. This program will generate a profit for you in month one. The OPA currently pays 64.2 cents for every Kilowatt Hour produced.

In short, you can invest in your own farm and receive up to a 15% ROI for 20 years, in contract with the Ontario Government.

Financing Options

What is available to me?

Due to solar energy's lucrative, low risk nature, financial institutions are providing investors with a reliable source of funding. Farm Credit Canada has been instrumental in helping farmers add a solar crop to their farm.

Solar Tracking

Up to 40% More Solar!

Made in Ontario

German Engineering

Ontario Domestic Compliant

The tracker will move your solar array into the solar noon position over the course of the day as the sun moves so it will produce the maximum Kw hours.

The kW hour production increases by as much as 30-40% which increases your income from your system. (by as much as \$4,000.00 per year).

With over 21,000 Solar Trackers operating worldwide, Lorentz Trackers are proven performers with unmatched quality and reliability.

Questions?

Common questions & answers

How long does it take to see income?

With financing costs being lower than monthly revenue, you'll make profit from the first day your system is online and generating power.

What if I sell my house or property?

microFIT and FIT contracts can be transferred to the new owners. Your solar equipment generating capacity will also add value to your property.

Will the rates change on my contract?

The rate on your contract is legally binding between you and the Ontario Government for the full 20 years. It is also protected under the Green Energy Act.
